

PORTRAIT ANDROID PVM

VZ-PVM-P4B3/ VZ-PVM-P4W3

ViewZ portrait Android PVM is a whole new way of merging digital signage and loss prevention for retail environments.

With its sleek design and elegant appearance, portrait Android PVM can enhance any retail space with advanced digital signage that's designed to attract the attention of customers while seamlessly providing loss prevention with the view from its built-in camera.

Designed for multi-location deployment, the CMS software allows for central management of digital contents from a single head-end, making it the ultimate advertising tool for national retails.

CMS Software

Content management software allows the administrator to centrally manage advertising contents via Internet or Intranet network. Browser based and userfriendly software also comes with an abundance of features that make managing a larger fleet of devices easy and provides scalable management by allowing devices to be bundled into groups.

CMS Highlights

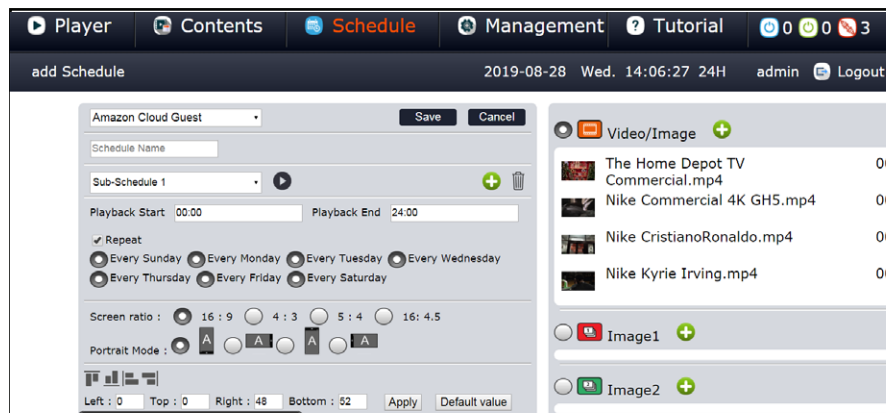

- Browser based software (requires Chrome)
- Allows for contents to be saved as playlists that can be uploaded to multiple devices.
- Allows for devices to be bundled into different "groups".
- Allows for contents to run on user-specified schedule.
- Easy content & array creation with preview option
- RSS Feed and Live Video Feed can also be integrated
