Please read this manual thoroughly before use, and keep it handy for future reference.

IP SEARCH TOOL

Instructions

Note

- IP Search tool finds IP devices on the network and change the IP address of devices. Here are the steps to use this program.

1. Connect

Connect the computer in LAN, and double click “Tools.exe” to execute the program.

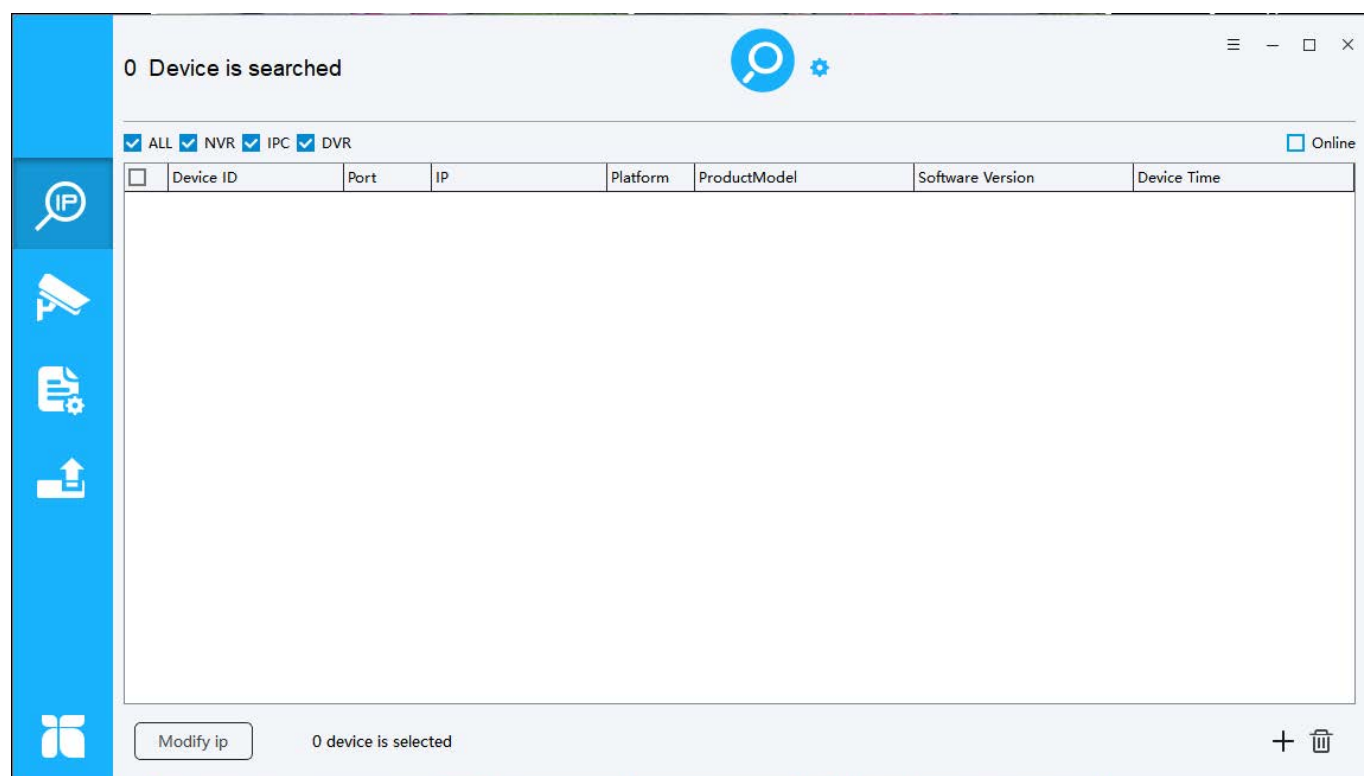

Tools_1.5_498_18
0606

QUICK START

2. Software Interface

Software interface shown below will appear.

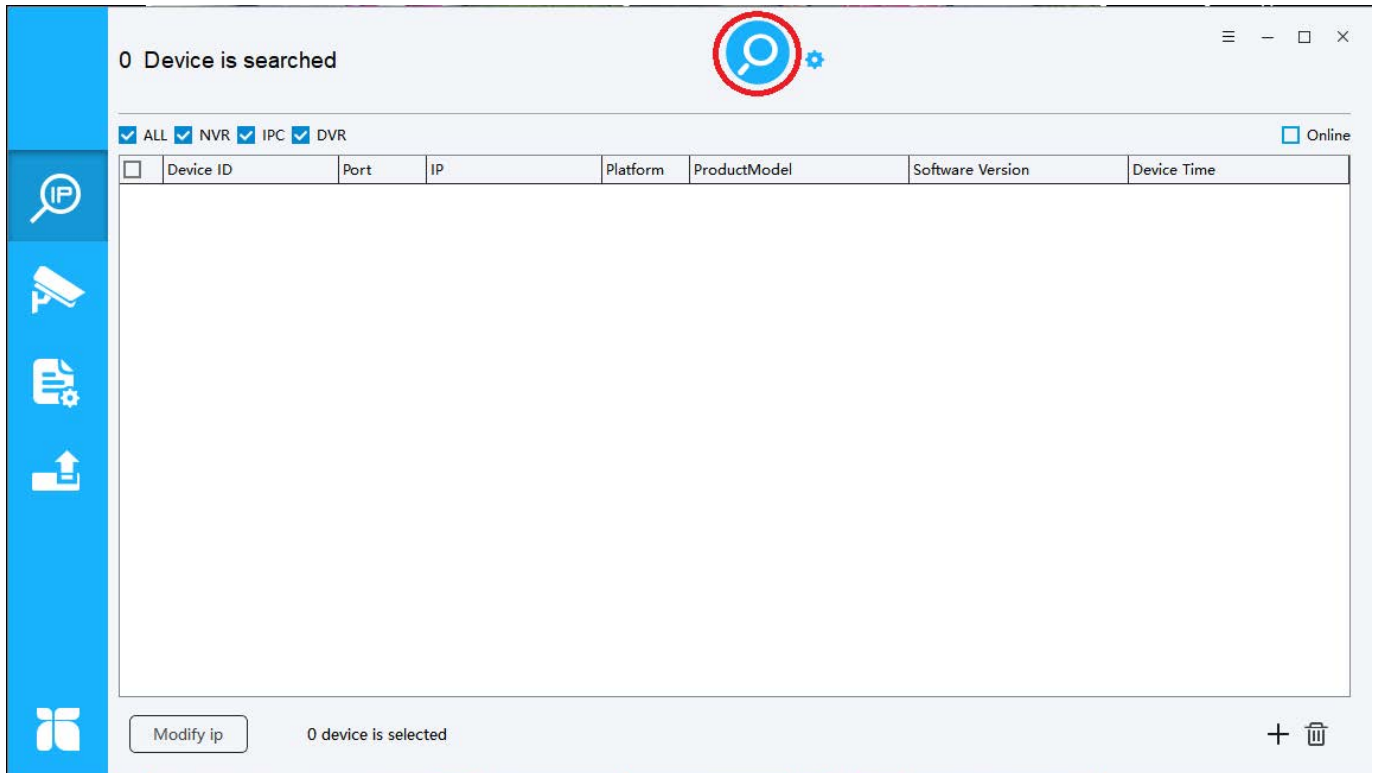

IP SEARCH TOOL

3. Start

Click “Search” button to automatically search the IP devices on the network, as shown below.

It will search for IP devices on the same network, and show the “Device ID”, “IP Address”, “Product Model” and “Software Version”

You can click “Search” again, Stop the search when you find device/devices that you want.

QUICK START

4. Change IP address of IP Camera

To change the IP device's IP address, select the device from the list and then click "Modify IP" to change the IP address. You can also change the other network parameters by doing the same.
